

Recruiting Top Echelon Cyber Security and Security Infrastructure Talent

InfoGuard Staffing Partners is a niche Cyber Security and Security Infrastructure staff augmentation firm. We partner with our clients to help mitigate the skills gap that they are currently facing within their security environment with top-notch human capital staff augmentation solutions. We apply a holistic and consultative approach, in an effort to fully understand our clients' high-priority Cyber Security and Security Infrastructure and how to help them bridge the human capital gap — thereby *getting them where they need to be today for a Secure tomorrow.*

InfoGuard Staffing Partners is fully entrenched within the Cyber Security industry on a daily basis. Combining InfoGuard's Cyber Security expertise, full inclusion in today's market's supply & demand needs for security personnel, and effective candidate engagement practices makes us the leading Cyber Security staff augmentation firm for top-notch and most-qualified security candidates in the industry.

We are dedicated to the Cyber Security industry by creating human capital supply through our internal training program available to Cyber Security professionals that are interested in building up their security skill set. This is a huge value to our clients as we scope future internal security initiatives within their organizations and train security professionals specifically for our clients' needs. InfoGuard has invested our time and capital in creating partnerships with Universities and Cyber Security programs nationwide to deliver the skills that our clients most desperately need.

Our human capital pipelines include (but are not limited) to the following skill sets: Cyber Security Analysis & Audit, Information Security, Cyber Security Engineering, Threat Intel Analysis, Business Risk Analysis, Security Assessment, Penetration Testing, Mobile App Development and Security, Vulnerability Mgmt., Secure Architecture & Design, Load & Performance Testing, Infrastructure Network Engineering, and Project Mgmt. Our niche staff augmentation solutions within the Cyber Security & Infrastructure focus include corporate & information security, cyber threat defense, risk mgmt., data governance, audit & compliance, critical infrastructure deployments, mobility, cyber security analysis, and development.

Our Value Add is simple, we pride ourselves in our effective intake practices that make InfoGuard Staffing Partners understand the needs of today's organizations in locating and acquiring talented professionals. This capability allows us to deliver candidates for our clients' human capital needs. Combining that with our Cyber Security industry expertise, market supply and demand knowledge, and candidate engagement makes us the leading recruitment firm for the best and most qualified candidates in the industry.
